The hydraulic excavator is no exception when a totally integrated concept is required in design work involving key components, manufacturing engineering, and product quality assurance in the factory. SUMITOMO hydraulic excavators are designed and manufactured today to meet the global demands of our many customers with the concept of Performance, Reliability, and Fuel Efficiency foremost in our minds. This proven Japanese technology and quality gives SUMITOMO excavator customers total peace of mind and provide a complete solution for the demands of the construction industry.

Engine and Hydraulics

New Generation Engine System "SPACE 5+"

The new engine system optimises fuel efficiency and environmental performance via the advanced common rail fuel injection system, cooled EGR system. At the same time, excellent response times are achieved.

Mode Selection by Throttle SUMITOMO UNIQUE DESIG

There are three working modes available: SP (Super Power) for heavy duty applications, H (Heavy) for normal working conditions, A (Auto) for a wide range of operations.

Common Rail Type High-**Pressure Fuel Injection System**

The system is equipped with a common rail type high-compression fuel injection system, which permits high-precision injection from multiple injectors under ultra high-pressure. Precise control of injection time and injection quality at the rate of 1/1000 second optimizes combustion, improves combustion efficiency, and reduces PM (particulate matter) substantially.

Cooled EGR System

The EGR (Exhaust Gas Recirculation) mixes exhaust gas, which is once exhausted, with the air intake that is taken in so as to lower the combustion temperature, thereby reducing NOx (nitrogen oxide). Adoption of the cooled EGR system, in which a water cooler is installed in the middle of the re-circulation pipe, permitting further decrease in the intake temperature, ensuring a better NOx reduction effect than the ordinary EGR.

24 valve OHC Turbo Engine with Intercooler

When the inter-cooler cools the intake air, which is compressed by a turbocharger and has reached a high temperature, the density of the air increases and the suction efficiency increases. Therefore, NOx and PM can be reduced substantially, permitting high output and improvement of fuel efficiency simultaneously.

Pump Transition Control SUMITOMO UNIQUE DESIGN

In the case of sudden lever movement and high load activation, the newly developed hydraulic control system reduces the main pump oil flow intentionally and keeps the engine speed at a constant level. This enables a reduction in fuel consumption. In addition, this also reduces the level of exhaust smoke due to excessive fuel injection.

Quick and Smooth Control Response

A total review of the hydraulic circuit and miscellaneous hydraulic settings guarantee speedy and precise operation through a smooth control lever.

Increased Pump Efficiency

The new modified hydraulic pump structure lowers the oil leak volume in the pump which means improved pump efficiency and improved engine fuel efficiency.

Automatic Power Boost SUMITOMO UNIQUE DESIGN

The digging power increases automatically in quick response to the working conditions without switching operations during heavy-duty digging work. It is SUMITOMO'S original design and continues for 8

Swing Relief Control SUMITOMO UNIQUE DESIGN

The hydraulic oil quantity required at the time of sudden swing motion is limited. The new hydraulic system can start the oil flow volume at the minimum level and then allow it to increase on demand. This optimum oil flow control significantly improves the fuel efficiency.

Durability and Maintenance

EMS permits fuss-free maintenancs

EMS allows greasing of the front attachments at intervals of 1,000 hours and substantially reduces the greasing trouble and time, as well as the maintenance cost, also reducing a noise.

■ EMS bushing

Precautionary use of EMS

Greasing interval: 1,000 hours

- Grease impregnated, Greasing is still necessary at every 1.000 hours. or six months, whichever comes earlier.
- 2 Greasing is necessary after underwater digging operation, because the internal grease can be forced out due to being submerged.
- 3 When a breaker, crusher, or some other special attachment are installed, greasing is necessary every day, because the pins and bushes are different according to the attachment manufacturer.
- 4 Bucket pins should be cleaned thoroughly when removing or fitting

High-Performance Return Filter

The hydraulic oil change interval is 5,000 hours, and the return filter change interval is 2,000 hours. One high performance return filter keeps the same level of filtering effect as a nephron.

The High-Performance Return Filter is made more precisely to condense the Nephron filter function.

•Hydraulic oil change: 5,000 hours •Life of filter: 2,000 hours

(A) A solid lubricant embedded in high strength brass forms a layer on the bush surface to prevent contact

1 The surface of the pin is plated to increase the surface hardness and improve the wear resistance accordingly.

en metals, maintaining an excellent lubricated state to reduce abrasion of joints.

© The dust seal has a double structure to prevent entry of abrasive materials and eliminating wear.

Stronger Boom and Arm

The strength of all joints has been increased to ensure durability, permitting operation at any site with severe working conditions and a large workload.

High-durability Bucket

The bucket is higher strength for impact and wear, providing long life and high performance.

High-rigidity Swing Frame

The rigidity and durability of the frame of the upper revolving unit has been increased to withstand rough handling during every operationd.

Reinforced Double Grouser Shoe

The reinforced double grouser shoe permit operation on rough roads, steep slopes, and other work sites where large machines must be used.

Full Track Guard Prevents Derailment (option)

Full track guard is efficient in preventing derailment of the links (chain) and protecting the rollers.

Ground Level Access to Engine Area Improves Preventative Maintenance

Parts cleaning and maintenance are possible from the ground without climbing onto the upper structure of the excavator body.

Remote fuel prefilter

A fuel prefilter is provided as standard equipment to reduce the likelihood of fuel clogging.

Hydraulically Driven Cooling Fan System

Optimum cooling control and reduction in noise according to the working environment.

Large Toolbox

A large toolbox is provided to completely store a large quantity of tools.

Easier Cleaning by Reversed Fan Rotation

The switch in the cab permits the cooling fan to rotate in reverse to remove dust from the radiator, oil cooler, inter cooler, and fuel cooler to prevent clogging.

Electric Indicator Permits Confirmation of Air Cleaner Clogging

The message on the monitor permits confirmation of air cleaner clogging. The indicator further permits confirmation of return filter clogging when the breaker piping and combination piping are installed.

The 900-liter Fuel Tank Ensures **Extended Operation.**

The large-capacity fuel tank reduce down time.

Fuel Tank

Stainless steel is used for the strainer that prevents dust entering during re-fueling. Furthermore, a maintenance hole is provided to permit easy periodical maintenance.

Maintenance hole for cleaning

Engine Oil Drain Coupler Prevents Oil Spattering

The engine oil pan provided with a drain coupler. The supplied drain hose prevents oil spattering to facilitate draining work.

Engine Maintenance Steps

The engine room designed to permit safe maintenance.

Catwalk on Both Sides

The house is provided with a catwalk on both sides to permit free movement during maintenance.

SUMITOMO's Redesigned Cabin and Seat for Optimum Operator Comfort

The seat reclining system allows the operator to lay the seat flat and to rest on site without removing the headrest.

The KAB Seat Eliminates Vibration

Safety and Operator Comfort

Operating Positions of Sliding Seat and Tilting Console

In addition to the tilting console that is adjustable in four steps vertically, the increased sliding distance ensures optimum working conditions.

Simple to Read LCD Monitor and Switch Panel

In addition to the monitor that is easy to read during daytime as well as nighttime by changing the backlight to white, a simple and convenient universally designed switch panel is provided.

Fluid Filled Cab Mounts

Four fluid cab mounts reduce vibration and impact transmitted to the cabin, and

improve the operators' sitting quality and reduce operator fatigue.

Automatic Air Conditioner with Round Outlets for Increased Comfort

The air outlets of the air conditioner are provided with round grills with wide adjusting angles. The efficiency of the air conditioner has been increased by pressurizing the cab to make it airtight, providing a comfortable space.

Flow Setting in 10 Patterns and **Switching of Combined Circuit**

The switch panel in the cab permits setting the flow rate for work with a maximum of ten different special

attachments in advance. A circuit change for the breaker and crusher is also possible in the cab.

ISO-compliant Pressurized Cab to Prevent Dust Entry

The sealed and pressurized (sealing by pressure) cab prevents entry of dust from outside.

Italian

Convenient One-touch Muting of AM/FM Radio

An AM/FM radio is provided as standard equipment. The mute switch on the left lever permits one-touch muting of

Safety and Operator Comfort

The Wide View Increases the Safety of Work

In addition to the wide front view, the down-right view is also made larger to enhance the safety of work.

Adoption of Gate Type Lock Lever

A gate type lock lever has been adopted to prevent sudden acceleration of the machine.

Large ISO-compliant Handrail

A large ISO-compliant handrail has been adopted to enhance safety when the operator gets on and off the machine.

Adoption of Megavolume Horn

An easy-to-hear megavolume horn has been adopted to make the horn audible in any work site. Safety during operation will be enhanced.

Emergency Escape Window

Allows operator to escape from the rear window in case of emergency.

Equipment that Enhances Safety

Safe and Easy Entry into and Exit from the Cab

A large handrail for easy opening/closing of the door and a non-slip plate are installed to permit the operator to get in and out of the cab easily.

Anti-theft Alarm System

SUMITOMO's unique anti-theft system can be activated by your SUMITOMO distributors at the time of purchase.

Safety Equipment in case of an Emergency

High-rigidity Cabin

The new cabin structure provides advanced operator protection.

Customer and Product Support

SUMITOMO's total commitment to product and customer support

has enabled it grow into a world renowned manufacturer of hydraulic excavators.

Supported by a global sales and service network of over four hundred distributors representing hydraulic excavators manufactured by SUMITOMO, the company supply 70% of total production from Japan to all five continents.

A spread of over one thousand outlets offering excellent parts and service support has global coverage ensuring SUMITOMO hydraulic excavator users have at their disposal Regional Spare Parts Centers, technical repair shops and

service vehicles carrying all the necessary equipment to service and repair any hydraulic excavator manufactured by SUMITOMO. SUMITOMO aims to produce the right products to meet all work applications and at the same time provide the highest level of more training and education to ensure complete product support quality throughout the service network in the world.

Specifications

SH700LHD-5B Technical data Engine

9					
SH700LHD-5B					
Model ISUZU GH-6WG1X					
Туре	Electric control, water cooled, 4-cycle diesel, 6-cylinder in line, direct injection, turbocharged with air cooled inter-cooler				
Rated output	345 kW (470 PS) at 1,800 min-1 (rpm)				
Maximum torque	1,980 N-m at 1,500 min ⁻¹ (rpm)				
Piston displacement	15,681 cc				
Bore and stroke	147 mm x 154 mm				
Starting system	24 V electric motor starting				
Alternator	24 V, 50 A				
Fuel tank	900 liters				
Air filter	Double element				

SIH:S

Two variable displacement axial piston pumps, one gear pump for pilot controls and the electronic-controlled engine of SPACE5 and SIH:S(SUMITOMO Intelligent Hydraulic System) includes:three working mode(SP,H,A) one-touch/automatic idling system and automatic power-boost.

Hydraulic pumps

Two variable displacement axial piston pumps provide power for boom, arm, bucket, swing and travel.

SH700LHD-5B		
Maximum oil flow	2 x 440 liters/min	
Pilot pump max.oil flow	27 liters/min	

Hydraulic motors

For travel:Two variable displacement axial piston motors. For swing:Two fixed displacement axial piston motor.

Relief valve settings

Arm	1	200 mm x 140 mm x 2,025 mm			
Bucket	1	180 mm x 125 mm x 1,465 mm			
Bucket (Mass)	1	200 mm x 140 mm x 1,450 mm			

Double-acting, bolt-up type cylinder end; hardened steel bushings Installed in cylinder tube and rod ends.

Cab & controls

The cab is mounted on 4 fluid mountings. Features include safety glass front, rear and side windows, reclining/sliding cloth upholstered suspension seat with headrest and armrest, cigarette lighter ,pop-up skylight window, and intermittent wiper with washer. The front window slides upward for storage, and the lower front window is removable. Controll levers are located in 4 positions with tilting control consoles. Reliable soft-touch swiches are a standard feature. An easy-to-read fuldot LCD monitor keeps operation in touch with critical machine functions.

Swing

Planetary reduction powered by an axial piston motor. Internal ring gear with grease cavity for pinion. Swing bearing is single-row shear type ball bearing. Dual stage relief valves for smooth swing deceleration and stops. Mechanical disc swing brake.

SH700LHD-5B			
Swing speed	0~6.5 min ⁻¹ (rpm)		
Tail swing radius	4,300 mm		
Swing torque	241 kN • m · 24,600 kgf • m		

Undercarriage

X-style carbody is integrally welded for strength and durability. Grease cylinder track adjusters with shock absorbing springs. Undercarriage with lubricated rollers and idlers.

Type of shoe:sealed link shoe

Upper rollers -

Heat treated, mounted on steel bushings with fluorine resin, sealed for lifetime lubrication.

Lower rollers -

Heat treated, mounted on steel bushings

with leaded tin bronze casting, sealed for lifetime lubrication.

Track adjustment -

Idler axles adjusted with grease cylinder integral on each side frame; adjustment yoke mechanism fitted with heavy duty recoil spring.

Number of rollers and shoes on each side

SH700LHD-5B			
Upper rollers	3		
Lower rollers	8		
Track shoes	47		

Travel system

Two-speed independent hydrostatic system with compact axial motors for increased performance. Hydraulic motor powerd output shaft coupled to a planetary reduction unit and track sprocket. All hydraulic components mounted within the width of side frame. Travel speed can be selected by switch panel. Hydraulically released disc parking brake is built into each motor.

SH800LHD-5B Technical data

Engine

	SH800LHD-5B
Model	ISUZU GH-6WG1X
Туре	Electric control, water cooled, 4-cycle diesel, 6-cylinder in line, direct injection, turbocharged with air cooled inter-cooler
Rated output	377 kW (510 PS) at 1,800 min-1(rpm)
Maximum torque	2,138 N-m at 1,500 min ⁻¹ (rpm)
Piston displacement	15,681 cc
Bore and stroke	147 mm x 154 mm
Starting system	24 V electric motor starting
Alternator	24 V, 50 A
Fuel tank	900 liters
Air filter	Double element

SIH:S

Two variable displacement axial piston pumps, one gear pump for pilot controls and the electronic-controlled engine of SPACE5 and SIH:S(SUMITOMO Intelligent Hydraulic System) includes:three working mode(SP,H,A) one-touch/automatic idling system and automatic power-boost.

Hydraulic pumps

Two variable displacement axial piston pumps provide power for boom, arm, bucket, swing and travel.

	SH800LHD-5B
Maximum oil flow	2 x 500 liters/min
Pilot pump max.oil flow	27 liters/min

Hydraulic motors

For travel: Two variable displacement axial piston motors. For swing: Two fixed displacement axial piston motor.

Relief valve settings

Boom/arm/bucket ···· 36.3 MPa(370 kgf/cm²) <holding pressure=""></holding>
Boom/arm/bucket ···· 31.4 MPa(320 kgf/cm²) <working pressure=""></working>
Boom/arm/bucket 34.3 MPa(350 kgf/cm²) with Power-up <working pressure=""></working>
Swing circuit ······26.5 MPa(270 kgf/cm²)
Travel circuit

Control valve

With boom/arm holding valve

One 4-spool valve for right track travel, bucket, boom and arm acceleration One 5-spool valve for left track travel, auxiliary, swing, boom acceleration and arm

Oil filtration

Return filter ······	···· 6 microns
Pilot filter	···· 8 microns
Suction filter	··· 105 microns

Hydraulic cylinders

riyaraano oy.		-
		SH800LHD-5B
Boom	2	200 mm x 140 mm x 1,893 mm
Arm	1	215 mm x 150 mm x 2,290 mm
Arm (Mass)	1	215 mm x 150 mm x 2,175 mm
Bucket	1	190 mm x 130 mm x 1,555 mm
Bucket (Mass)	1	215 mm x 150 mm x 1,520 mm

Double-acting, bolt-up type cylinder end; hardened steel bushings Installed in cylinder tube and rod ends,

Cab & controls

The cab is mounted on 4 fluid mountings. Features include safety glass front, rear and side windows, reclining/sliding cloth upholstered suspension seat with headrest and armrest, cigarette lighter ,pop-up skylight window, and intermittent wiper with washer. The front window slides upward for storage, and the lower front window is removable. Controll levers are located in 4 positions with tilting control consoles. Reliable soft-touch swiches are a standard feature. An easy-to-read fuldot LCD monitor keeps operation in touch with critical machine functions.

Swing

Planetary reduction powered by an axial piston motor. Internal ring gear with grease cavity for pinion. Swing bearing is single-row shear type ball bearing. Dual stage relief valves for smooth swing deceleration and stops. Mechanical disc swing brake.

	SH800LHD-5B
Swing speed	0~6.4 min ⁻¹ (rpm)
Tail swing radius	4,300 mm
Swing torque	266 kN • m · 27,100 kgf • m

Undercarriage

X-style carbody is integrally welded for strength and durability. Grease cylinder track adjusters with shock absorbing springs. Undercarriage with lubricated rollers and idlers.

Type of shoe:sealed link shoe

Upper rollers -

Heat treated, mounted on steel bushings with fluorine resin, sealed for lifetime lubrication.

Lower rollers -

Heat treated, mounted on steel bushings

with leaded tin bronze casting, sealed for lifetime lubrication.

Track adjustment -

Idler axles adjusted with grease cylinder integral on each side frame; adjustment yoke mechanism fitted with heavy duty recoil spring.

Number of rollers and shoes on each side

	SH800LHD-5B
Upper rollers	3
Lower rollers	9
Track shoes	51

Travel system

Two-speed independent hydrostatic system with compact axial motors for increased performance. Hydraulic motor powerd output shaft coupled to a planetary reduction unit and track sprocket. All hydraulic components mounted within the width of side frame. Travel speed can be selected by switch panel. Hydraulically released disc parking brake is built into each motor.

		SH800LHD-5B
Traval appead	High	4.3 km/h
Travel speed	Low	3.0 km/h
Drawbar pull		502 kN ·51,190 kgf

Lubricant & coolant capacity

	SH800LHD-5B
Hydraulic system	720 liters
Hydraulic oil tank	310 liters
Fuel tank	900 liters
Cooling system	108 liters
Final drive case(per side)	13.8 liters
Swing drive case(per side)	5.7 liters
Engine crank case (with remote oil filter)	52 liters

Auxiliary hydraulic system

Model	SH800	LHD-5B
Auxiliary piping type (option)	For Breaker	For Double (breaker & crusher) acting
Arm type	STD	STD
Bucket linkage type	STD	STD
Auxiliary hydraulic pump flow	max.480 liters/min	max.1 000 liters/min

Weight & ground pressure

Model		SH800LHD-5B (Mass)	
Shoe type	Shoe width	Operating weight	Ground pressure
Triple are upor abox	650 mm	80 100 kg (81 400 kg)	109 kPa (111 kPa)
Triple grouser shoe	750 mm	80 800 kg (82 100 kg)	96 kPa (99 kPa)

Lifting capacity

- Notes: 1. Ratings are based on SAE J/ISO 10567.
 Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 The load point is a hook (not standard equipment) located on the back of the bucket.
 *Indicates load limited by hydraulic capacity.
 0m = Ground.

- Notes: 1. Ratings are based on SAE J/ISO 10567.

 2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.

 3. The load point is a hook (not standard equipment) located on the back of the bucket.

 4. *Indicates load limited by hydraulic capacity.

 - 5. 0m = Ground.

A: Radius of load
B: Bucket hook height
C: Lifting capacity

Unit : kg

Standard equipment

[Hydraulic system]

- SIH:S hydraulic system Selectable operation mode (SP mode, H mode, and A mode)
- Auto/one-touch idling
 Automatic 2-speed traveling
 Automatic power boost
- Arm/boom natural lowering
- prevention valve

 Arm/boom reactivation circuit

 Swing brake system

 Swing ABS

- Auxiliary valveHydraulic drive cooling fanHigh-performance return filter

[Safety equipment]

- Rearview mirror (left/right)
- · Emergency exit Seat belt
- Gate lock lever
- Traveling alarmAnti-theft alarm system
- Engine room fire wall
- Fan guard
- Engine emergency stop switchMegavolume horn

 - - Clock • Magazine rack

• Defroster

- Accessory caseFloor mat
- Armrest & headrest

[Cab/interior equipment]

Tilting console mechanism

• Automatic air conditioner

Hot & cool box
 KAB operator's seat

Seat suspension

• Rise-up wiper

- Ashtray & cigar lighter • Room light
- Coat hookShort lever

[Others]

- EMS
- Long-life hydraulic oilTrack guard-Double track guard
- Five lights
 (on the main unit, atop the cab, and at right/left of arm)
- Two fuel filters
- (with water separator)Fuel prefilter (with water separator)
- Double-element air cleaner
- Pre-cleanerLarge tool boxA set of tools

(with intermittent operation function)

• Cup holder

• AM/FM radio

Accessories (option)

- 12V power (DC-DC converter)
- Full track guard
- Rain reflector
- Refuel pump
- Hose burst check valve for arm/boom cylinder

■ Polycarbonate with sunshade roof top window

- ■Lower window guard
- Head guard (OPG level 2)
- Air suspension (KAB seat)
